THE WORLD OVER

NEW AEROPLANE SATISFACTORY

RAISING OF PRICE LEVEL ASKED

A \$600,000,000 CONVERSION LOAN?

TORONTO—Jim Molison soared over Toronto on Thursday in the new Seafarer II, and after half an hour in the air said he was perfectly satisfied with performance of the plane in which he and his wife, Amy, hope to break the long distance flight record.

They will take off from Wanaea Beach for Bafford the first day of the weather permits, flying from Toronto to the beach, staying the night there, and making the big jump at daybreak the next day.

OTTAWA—The setting up of an agricultural credit corporation which would operate on a non-profit basis is suggested in a brief presented to the Royal Commission on Banking by a special western interprovincial committee appointed by premiers of the three prairie provinces.

The capital structure of this corporation would be made up by Dominion and provincial governments, together with some contribution from the borrower. Credit from it should be made available at the lowest cost as a matter of public policy.

The Dominion government should adopt measures designed to raise the level of agricultural prices "to a point which would restore the farm income" the committee asserts.

TORONTO—The Toronto Mail and Empire in a dispatch from its Ottawa correspondent said on Thursday last that announcement would be made in the capital within 10 days of Canada's new conversion loan which is described as the "largest single financial operation Canada has ever attempted."

The newspaper said unofficial estimates placed the amount of the loan at \$600,000,000 to be borrowed at an interest rate not exceeding 4.5 per cent. "All the chartered banks and practically every banking house," the Mail and Empire said, "will be mobilized into the most comprehensive security selling units ever established in this country. An intensive advertising campaign will blanket the nation with the patriotic appeal: 'Put the loan over.'"

"Pooh!" exclaimed the young lady driver as she sped telephone lines, climbing poles as she approached. "I suppose they think that I've never driven a car before."

An old fashioned girl in one who spends half her time worrying about her petticoat showing.

Feeding of Beef Cattle

It is expected that some 2500 head of beef cattle will be fed this winter under the rancher-farmer contract system which is to be continued for its fourth year, under the supervision of the provincial department of agriculture. John Wilson, who has been supervising the feeding arrangements in the Lethbridge district, has been re-engaged by the department for the work and his territory is being extended to as far north as Red Deer. Mr. Wilson is now working in the territory between Didsbury and Red Deer, where it is expected a considerable number of the cattle from the ranches will be fed this winter.

TENNIS NOTES

CARBON TENNIS CLUB DEFEATS THREE HILLS

The Three Hills Tennis Club defeated the Carbon club on September 24th to play a return match with the Carbon Lawn Tennis Club. The result of the match was a win for Carbon by four events to three.

The following are the results and scores:

Men's Singles—M. Holmquist, Three Hills, defeated W. Foxon, Carbon, 1-6, 6-4, 6-4. M. Wilwer, Three Hills, defeated W. Foxon, Carbon, 6-2, 6-3.

Ladies' Singles—Miss H. Colburn, Three Hills, defeated Miss M. Ramsay, Carbon, 6-2, 6-3.

Mixed Doubles—W. Foxon and H. Edwards defeated R. Murray and M. Wilwer, Three Hills, 6-4, 6-1, 6-4.

Space and B. Ramsay, Carbon, defeated M. Holmquist and L. Bowhay, Three Hills, 6-4, 6-1, 6-4.

Ladies' Doubles—Misses N. Hemmings and A. Wise, Carbon, defeated Misses D. Colburn and D. Murray of Three Hills, 6-1, 6-5.

Mixed Doubles—B. Ramsay and Miss M. Ramsay, Carbon, defeated R. Murray and Miss D. Colburn, Three Hills, 6-1, 6-2.

George Bouchard of Wayne had a unique accident near Heath on his way to the Grenier house. About two miles off the gravel on the Henshott road on Tuesday night Sept. 19th, he encountered two antelope on the road at about 12 o'clock. One of the animals left the road but the other was struck by the car and hurled over one of the front fenders, striking the side of the door. So great was the impact that the front light was broken, and the door badly dented in the Port coach. Mr. Bouchard got out of the car and looked around but evidently the animal was not badly hurt for it had disappeared.

The annual harvest of garden produce is in full swing and potato crops are yielding well.

"Do you summer in the country?"

"No, I summer in the city."

NASH STORES BROKEN INTO ON SUNDAY NIGHT

Cash and Goods Valued At \$400 Taken; Entrance Gained Through Back Door

SAFE TAMPERED WITH, BUT NOT OPENED

Some time between Sunday night and Monday morning C. H. Nash's grocery store and the adjoining store of Daphne Nash, were broken into and goods to the value of between \$400 and \$500 were taken.

The thief, or thieves, first attempted to gain entrance through one of the back windows, from all indications, but steel bars hindered their action and finally the panel in the back door was taken out and entrance was thus gained to the building.

In the C.H. Nash store it is said a large quantity of tobacco, cigarettes and candy and groceries were taken. The Nash register was rifled and a few dollars taken from it. Not satisfied it seems, the culprit or culprits attempted to open the safe in the rear of the combination and hinges, but did not get it open.

The Daphne Nash Store in the same building was then entered and watches, shirts and other wearing apparel was taken.

Constable Radcliffe of the R.C.M.P. was notified and is conducting an investigation.

Last year these same two stores were entered in somewhat the same manner, and a similar loss occurred, but the thieves were never brought to justice.

October 1 and November 1 ARE LEGAL HOLIDAYS

It has been announced that Thanksgiving Day will be observed on Monday, October 9, and Armistice Day on Saturday, November 1, giving from year to year a fixed holiday.

While Armistice Day is a fixed holiday on November 11, Thanksgiving from year to year is now fixed by order-in-council. It is usually planned, however, to be, as this year, on the second Monday of October.

Southern Alberta's Pioneer Wheat Champion

Since its recovery of the world wheat championship at the world grain congress at Regina this summer, when Pioneer, sown on April 25, harvested 52.000 bushels for the finest sample of 1932 yield spring wheat among competitors from many countries, Southern Alberta has discovered that it had a grain champion 40 years ago for which it has records.

The first German Baptist Church, Frederalton, is having extensive repairs done to it. The interior is being repainted and windows and doors are being given the new look.

A copy of "The Alaska Weekly" published at Washington, this week contains a little story. The "Tale" which gives credit to W.H. Olive of Carbon, as the author. It appears that Mr. Olive wrote the little incident to a friend many years ago and it has been unearthed and published by the U.S. weekly.

LOST—on Tuesday between Carbon and J.B. Currier's farm, black suit, bag containing articles of clothing. Can be identified by cuff links. In shirt, with initials C.E.M. on the pocket. Please return to Carl E. Moorehouse, Carbon.

Super Best Crop

Raymond sugar factory has opened for operations for the 1933 season. The prospects are that the crop of sugar beets will reach last year's record crop of 150,000 tons.

THE PRAYER I HATE

I do not like to hear him pray
On knelt knee about an hour;
For grace to spend right the day,
Who knows his neighbor has no fear.

I'd rather see him go to mill
And buy his luckless brother bread;
And see his children eat their fill,
And laugh beneath their humble shed.

I do not like to hear him pray,
Who loans for twenty-five percent.
For then I think the borrower may
Be pressed to pay for fuel and rent.

And in that book we all should read:
It says the lender shall be blessed.
As sure as I have eyes to read,
It does not say take interest.

I do not like to hear him pray,
With jealous ear and silent dread,
When weaker woman tells him wrong,
And then is asked to work for less.

Such plans shavers I despise,
With folded arms and face demure
They lift to heaven their angel eyes
And steal the earnings of the poor.

I hate the prayer we read and hear,
That's offered for the orphan we;
By him who sees them crunched by wrong,
And only with his lips does feel.

I do not like to hear him pray,
Let blessings on the widow be,
Who never seeks her home to stay,
"If want o'erturns you come to me."

Such soulless prayers I hate to hear,
If wrong I hope to be forgiven,
No angel wings them upward bear,
They're lost a million miles from Heaven.

Local News Items

S. J. Garrett was a business visitor to the city on Tuesday.

Mr. and Mrs. Alex Reid R. returned to Calgary on Sunday and returned Tuesday evening.

I. Gutman spent a few days in the City last week.

Mr. Teagle and Mr. Blake, of the Imperial Oil Company, were Carbon visitors on Thursday last.

A meeting will be held in the municipal office on Friday evening, Sept. 28, at 8 p.m. for the purpose of forming a club interested in literary and dramatic work.

Mr. and Mrs. C.H. Nash and family spent Sunday and Monday in Calgary.

A meeting of the Carbon Curling Club will be held in the municipal office, next Thursday evening, Oct. 5, at 8 p.m. for the purpose of outlining the coming season's activities. All curlers are requested to attend.

R. B. Wilkinson of Calgary, was renewing acquaintances in town over the week end. Mr. Wilkinson at one time owned the Wilkinson Hardware here, but in 1925 the business was sold to the Builders' Hardware Store.

Heavy frosts have visited the province the past few nights and many local car owners report damage from frozen rudders. With the frosty nights we are having clear weather and practically all harvesting operations in the district have been completed.

The first German Baptist Church, Frederalton, is having extensive repairs done to it. The interior is being repainted and windows and doors are being given the new look.

EARLY ELECTION IS PREDICTED BY POLITICIANS

EDMONTON—Possibility of an early Alberta provincial election is seen by political observers in the announcement of a Conservative convention by D.M. Dugan, party leader in the province.

Mr. Dugan said the convention would be held some time in November at either Edmonton, Calgary or Red Deer, a definite date and place to be announced later. Some 50 delegates are expected to attend and arrangements are being made to have Prime Minister R.B. Bennett attend the convention which will prepare the party's platform for its next election.

Reports of an early election are added to by the campaign speeches at the recent election in the various parts of the province by Liberal and Conservative leaders.

NEWS BRIEFS

The number of wire-enters of all classes in Canada at the census of 1921 was 2,506,001 and they earned \$1,867,469 during the twelve months prior to the census, according to the Dominion Bureau of Statistics. There were 1,248,500 males whose earnings were stated and 528,358 females. The latter, which did not report earnings was \$834.83. The average yearly earnings of all ages was \$14.75.

Among selected occupations the highest average earnings by males were, locomotive engineers, \$121.84; railway conductors \$118.40; school teachers \$115.74; telegraph operators \$110.75; carpenters and printers \$108.40; street car conductors and motormen \$112.50; locomotive firemen \$121.73; book binders, cashiers, etc. \$112.21; electricians and wiremen \$112.21; and stationery engravers \$118.40.

R. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway, was appointed to the position of vice-president of the Consolidated Mining and Smelting Company of Canada, at a special meeting of the directors of that company recently.

"I am satisfied with the performance of Miss England III in the races against Miss America X. Hubert Scott, Paine, defeated challenger for the championship speedboat race at Green Bay Wood, told an interviewer prior to sailing for England aboard the Empress of Britain. He added that he hoped to try again next year with a more powerful engine boat."

Rev. Wm. McNeil had a hurried trip to Calgary on Monday, being called to the bedside of a sick friend.

ADVANTAGES BEHIND ITS
NEWS SERVICE**

THE PETITION

A petition is being circulated among
the rubequies of Carbon in an attempt
to have the Village Council grant the
Carbon Tennis Club permission to
erect another court in the local park.
Many signatures have been affixed
to this petition and it looks as if it
will receive the two-thirds majority.
The erection of another tennis court
in Carbon should be sanctioned to
everyone for the benefit of the sport.
If there are sufficient signatures, the
warrant the erection of another court
there must be enthusiasm in this sport
and when a town can boast of five
hard tennis courts they certainly are
an asset to its ratepayers.

There is not now sufficient room in
the park for a baseball diamond. Apart
from that the school grounds provide
ample space for this sport and for this
reason there ought to be no excuse for
prohibiting the tennis club from erect-
ing their fifth tennis court in the park.

While The Chronicle does not relish
the idea of petitions, believing that
they often cause more discontent than
good will, we do hope that the Tennis
Club may be granted permission to
erect their fifth court in the local park.

A SKATING CLUB

The fall days are here and it is time
that we turn our thoughts to the com-
ing winter sports.

In the past the Carbon Hockey Club
has usually sponsored the sport of
skating and invariably finished the
season with a deficit. The reason was
that only hockey players seemed to

have sufficient interest in the sport to
make it successful and as a result the
sport lacked the patronage of the pub-
lic.

This cannot happen again. Some-
thing must be done to put skating and
hockey on a sound basis the same as
tennis in Carbon.

We suggest—and others agree with
us—that since the Village will not run
the rink, the only other way out of
the situation is to form a skating and
hockey association in Carbon, with
officials from the business men of the
town. This club could look after the
interests of the skaters and sponsor
a hockey team. In this way there
would be more interest in the sport
and the children and their parents
would benefit. At the same time we
could be giving our younger boys
and girls an opportunity to develop
into good skaters and hockey players.

We believe the suggestion is worth
a trial, although such an organization
must comprise the citizens of town—not
the hockey players.

PATRONIZE YOUR HOME PAPER

A town prospers in proportion to the
horse-power and horse-sense of its
household.

A community prospers when people
associate with each other, deal fairly
with each other and keep community
money circulating in the community.

Fine feathers do not always make
fine birds, neither do fine pictures in
a catalogue make fine goods.

Advertising opens the doors of
knowledge to the buying public; and
the public wants it, expects it, and is
disappointed if it does not get it.

The most apt illustration we ever
heard of the soundness and enormous
value of advertising is the story of
the lady who, when passing the office
of the insurance agent, asked her husband
the insurance agent was. Now you tell
me.

However, if there's anything that
proves the truth of the old saying:
"antiquity is greater than realization,"
it's ordering an article from a
mail-order house.

Mail order houses do well where the
merchants do not, not because the
merchants do not advertise, because
people will buy advertised goods.

Why let Carbon business and Carbon
money go to some other town or mail
order house for the want of a little
advertising and publicity. The dollar
that goes the farthest is the one that
stays at home—in the home town and
district.

The community ought not to stand
for a newspaper that does not stand
for the community; and nothing but
an unwarranted modesty keeps us
from stating the reverse of this same
proposition.

We are doing our best to supply
Carbon and district with a good news
paper, trying to build up a community
spirit. Business men who advertise in
their home paper and people who pa-
tronize their home paper can consis-
tently advise and advocate the idea of

Professor Drummond Sees No Chance Of Making Profit From Canada's Basic Industry

"Any person who looks for a profit from farming in 1933 will have his head examined," Prof. W. M. Drummond, of the University of Toronto, declared at the Liberal-Conservative summer school at Newmarket, Ont.

"There has been so much said since 1912 about the fundamental importance of a prosperous agriculture in this country, of the absolute impossibility of anybody in Canada being prosperous without Canada's farmers being prosperous that one would have thought the major interest of reformers with any materialistic ambition would have turned towards the formulation of a policy calculated to guarantee the utmost in the way of a prosperous agriculture," he went on.

"The fact that such has not been the case leads us to the conclusion that most of the statements concerning the great importance of agriculture in our national life were never intended to be taken seriously."

The reformer who would improve the farmer's lot was almost certain to throw up his hands in despair when really looking at the task in hand, Professor Drummond said.

The very nature of farming prevented curtailment of production to meet a falling market, he asserted. The farmer, in his bargaining contracts, was usually in the position of the non-union laborer seeking work from an employer of many thousands of men.

While prices might drop, he said, costs usually remained at the same old level. A correspondingly larger portion of the income had to go to the covering of fixed costs, while at the same time falling prices stimulated the farmer to produce more in order to attempt to cover his costs.

The profession of the farmer, Prof. Drummond held, was as dignified as was necessary. Much of the farmer's trouble could be traced to the opinion held by many city dwellers that the man of the soil was not too tight.

"We must see to it that the stigma is removed and that the farmer himself is equipped with a proper pride in his work. Unless we do this we are only admitting insanity when we talk about an intelligent and prosperous agriculture population."

A Wonderful Record

Cow At Woodstock, Ontario, Acclaimed As Greatest Holstein At Woodstock. This is a cow named Springbank Snow Countess which is acclaimed as the greatest Holstein on record. That record is, indeed, an inspiring one. At the time this cow has produced 9,977 pounds of butter, approximately 200 cubic feet. Malted into 60,000 bricks this would make a line three-quarters of a mile long, or a wall five feet high and nearly 90 feet long. It is enough butter to fill 60,000 slices of bread, making the generous allowance of half a cubic inch to a slice. That much butter would cover two entire football fields, including end zones, and there would be enough left over to cover two-thirds of another field. It would go to make 300-foot blocks of a street 38 feet wide. The milk this cow every produces is enough to supply more than a score of children with a quart every day.

It is truly a wonderful cow.—Detroit Free Press.

According To Calculation

Normal Man At 70 Has Eaten 700 Times His Weight

A healthy man, with a normal appetite, who reaches 70 years of age, times his own weight, according to the calculation of experts of the Faculty of Paris. They have figured that in his span of seventy years the average man of 140 pounds would have eaten thirteen tons of bread, fifteen tons of vegetables, seven tons of meat or thirteen whole cows, seven tons of fruit, 1,600 pounds of candy and sugar, drunk 15,000 quarts of milk and 20,000 quarts of beer, in Europe, or water in America.

Restaurant Patron: "Waiter, do you call this an oyster stew?" The waiter in this stew isn't big enough to flavor it.

Waiter: "Well, such fat oysters was not put in to flavor it, sir. It's just supposed to chime it."

Nearly twice as many bananas are being shipped from Guadeloupe, French West India, as a year ago.

Failed To Make Good
Boy Taken From Orphanage Lost Good Home Through Kindness
About two months ago a wealthy couple in the United States saw a photograph of an orphanage boy who looked so like their son who had been drowned that they adopted him. He was to stay with them for some time to see if he could be "made over" to resemble their own boy, and if he suited he would become a member of the family heir to luxurious home and great wealth.

But when the time of probation expired they sent him back to the orphanage. He was rude and overbearing and showed no signs of becoming the kind of boy they could lavish their love and attention upon.

This lad had a wonderful chance, one that reads like a story rather than a romance. It is difficult to believe to learn that he so completely failed to measure up to it.

It is said to the rulemen which seems so general among young people? Is it a case of setting a beggar on horseback? Or is it just that you cannot make a charge out of a sow's ear?—St. Thomas Times-Journal.

Good Amateur Sprinter

Prince Of Wales Believed By Inches In Race

England's 35-year-old Prince of Wales may be a poor horseman, but he has just revealed himself to be an amateur sprinter of considerable merit.

Competing in the Old Comrades' races at the Welsh Guards annual sports at Hounslow Barracks, London, the prince, who is colonel-in-chief of the regiment, was beaten only by inches after starting from scratch in the 100 yards flat race, seventh to much younger men in the 100 yards handicap for officers, and second in the 50 yards hurdle race for men and women.

The races were not exactly up to Olympic standards, and most of the competitors ran in everyday long trousers and walking shoes, but the events were contested in great style, with the prince a leading figure.

Great Weakness Of

Canada's Export System

Not Knowing Real Requirements Of British Market

One of the greatest weaknesses in Canada's exporting system is "that we do not always desire people what they want in the form in which they want it." Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain, told a Canadian Club luncheon meeting in Toronto.

"We try to sell them something they have heard of," he said. "It is a mistake to sell a man what he wants to try to persuade him that a substitute will do. He has heard of it, and the High Commissioner could not do better than send representatives to Old Country to study conditions and learn the requirements."

"We in Canada," he said, "should never forget the fact that 25 per cent. of the people of Great Britain are food producers for whom the task of feeding food for 100 per cent. of England's population is an impossible one."

Middle Age Of Year

Thirty days late September a short month with a little of everything in it; an epitome of the year, with the hottest spell of summer often enough at its beginning, a cold, bleak, and winter at its end on the verge of Indian summer, and a souvenir of April somewhere in between some fresh morning before the first real autumn appears in the parks and country woods, as the year now in its late middle age remembers its youth.

Nearest Thing He Knew

She shut off the gramophone and turned excitedly to her father.

"Dad," she exclaimed, "that is the latest kind of jazz record. Did you ever hear anything so wonderful?"

Father, who had been trying to read his evening paper, growled:

"No," he replied wearily. "I can't say I have, although I once heard a collision between a wagon load of empty milk cans and a farm-cart filled with ducks."

Enforcement of the law against overworked passenger buses, trucks, and taxis in rural districts of Egypt is reported to have increased railway receipts between \$410 to \$500 a day.

Learn Efficiency From West

Chinese Women Are Rapidly Advancing In Public Life

Speaking on "The Changed Woman in the Changing China," at the Women's Canadian Club, Toronto, Dr. Wu, head of Gilling College, China, astonished her audience by outlining the rapid advance of Chinese women in public life. Dr. Wu spoke of how much women must face the future. "We have the rich heritage which has taught women, through its culture and the patriarchal system, self-control, poise and the ability to handle men. We are learning efficiency from the west. It remains for us to prove our worth now that we have opportunity."

Chinese women in medicine, nursing, education, politics, journalism, and even law were listed in large numbers. And this sensational change in attitude was noted: In years past women's voices were not supposed to be heard outside her home courtyard. In recent months Government talking pictures had been taken of the girl students in songs and first-aid practice at Gilling College to be shown for the recreation of soldiers at the front. Two women's voice, once outside the home courtyard, was heard even over the firing line.

Equality in inheritance and marriage rights were noted.

Dr. Wu referred to the young woman who was virtually director of the research department of a great bank, and to another who held every part of employment in a bank, started a bank of her own which had six millions of deposits.

Dr. Wu made it clear, however, that China was a country so big that no description of women's advanced status held for every part. Only a portion of the educated women had taken advantage of the rights. Tribute was paid by the speaker to western missions for their work in first opening education to women in China.

New Store For Churchill

Ready For Business Soon

Work has been started on the new retail store of the Hudson's Bay Company at Churchill, which is being constructed at the corner of Hudson Square and Kelsey Boulevard, on the new townsite plan.

The building will be a two-story structure 30 by 50 feet. It provides for a store, warehouse and quarters for trading posts and a small hotel.

The first trading post of the Hudson's Bay Company in Churchill was established shortly after the company was founded and preliminary surveys for trading posts were in the sub-Arctic in 1668.

At present the company has a warehouse about one mile from the townsite, and a trading post in old Fort Churchill, on the west side of the river.

Newspapers On Cruise's Island

Robinson Crusoe, if he lived today, would have to look for footprints in the sand to learn of visitors to his island. He'd just glance through the social column of the Tobago Times.

Tobago, the island indicated as the scene of Daffoe's immortal story, has been the first newspaper in his history.

FIRST TIGER CUBS BORN IN ENGLAND IN FIFTY YEARS

Our picture shows three tiger cubs born at Whiplanage Zoo, in England, on view for the first time. Now seven weeks old, these playful little mammals are the first to be born and continue to live in England, in captivity, for fifty years. The mother is giving one of the cubs a wash-bath, up with her substantial lounge.

Advantages Of Rural Life Offer Attractions To The Town Dweller In Many Ways

Scientists Study Volcanic Ash

Professor Of University Of Saskatchewan Completes Important Research

Professor W. G. Worcester of the ceramic department of the University of Saskatchewan has recently completed an important piece of research on the possible uses for volcanic ash in the field of ceramics, according to a bulletin of the department of railways, labor and industries.

Extensive deposits of volcanic ash have been found in Saskatchewan in the Swift Current district. Other deposits are also known to exist in the Twelve Mile Lake Valley near the Victor and in the general area known as Wood Mountain.

There has been established at Swift Current a large plant which now produces household cleaners, abrasive products which have volcanic ash as their base material.

The work so far has proven that within certain limitations the volcanic ash is likely to prove of more interest and importance to western Canada than to the more easterly sections, where an abundant supply of excellent feldspar is available in all commercial grades.

Excess Wheat Production

Problem Result Of Necessity For Supply During War

The problem of excess production of foodstuffs can be traced directly to the necessity of supplying the armies in the world war. World production in 1913-14 was 1,100,000,000 bushels. In 1923-24, a sharp reduction in yields in the United States was chiefly responsible for the lower total of 1,000,000,000 bushels with Russia and China excluded. Semi-famines of crops in the last two years removed Russia temporarily from the world market. Meanwhile Germany, Poland, Australia, Canada, the Argentine and some of the Danish countries not only increased their wheat acreage, but when Russia re-enters the world markets, there is in prospect a wheat glut that may ruin the wheat structure for any agriculture group on an export basis.—Chicago Daily News.

Lower Rate For Apples

Freight Charges On Shipments From Okanagan Valley Reduced

Reduced freight rates on apple shipments from the Okanagan Valley district of British Columbia to east Canadian points recently announced by the Canadian National and Canadian Pacific railways became effective Sept. 1.

On shipments to eastern Canada the reduction is 25 cents per 100 pounds, and to stations in Ontario west of Port William and Armstrong and the provinces of Manitoba, Saskatchewan and Alberta the rate is 18 cents per 100 pounds below the scale formerly prevailing.

The new rates, in effect until May 31 next year, are expected to greatly assist apple growers in marketing their fruit.

Epidemic Mystifies Farmers In Trinidad

Natives Think Wrath Of Gods Causing Cattle To Die

A mysterious epidemic of cattle deaths, puzzling and baffling to Indian farmers has broken out in the neighborhood of a deserted old Spanish airport, 14 miles from Port of Spain, Trinidad.

The epidemic believed caused by black-throated vultures has discouraged the natives' belief in the use of inoculation of cattle and the farmers are resorting to the old method of sacrifice to appease the wrath of the gods which they believe are now visiting them.

Sky A Sea Of Flares

Within four hours 5,000 flashes of lightning were counted by an observer in the neighborhood of the airport. The instrument was in the Westphalia. In one and one-half hours between 30 and 40 discharges a minute were registered. Observers said that during the four hours the sky was a sea of flames.

(Charles Howard-Tribune.)
York Herald-Tribune.

Unemployment and its consequences in reduced rations give many city people a new view of life with its constant occupation on the farm. Our present circumstances may, therefore, bring about the revival, after a quarter of a century, of the back to the land cry, which seems to gain headway in spite of distress and bankruptcy in agricultural communities.

The charms of rural life is always the same; only the counter attractions of the town go up and down in value with prosperity and with depression. In any period, good or bad, a well man can always produce a good living for his family from the soil. Those who love country living are ever looking toward the farm and are not to be deterred by city needs at musty boots or dusty clothing or the pull, push and shove of the city, about being chambermaids for a year, they know well the delight of seeing the milk come home frozen in the pail, the luxury of rich cream and sweet butter.

They know too the ecstasy of the sun rise over the hills and they have felt the not always silent welcome of the cows and horses when the stable doors are opened at feeding time. They know the voice of their own rooster crowing to the dawn and green and purple dawns and the animals strait. Though the care of animals is exacting, it is always a pleasant occupation for some people, and some of the most interesting of all. Horse means something to the man who works with him. Some men (and women) are passionately fond of horses or poultry, and would always be so employed if they could. Others take naturally to fruit growing and are content to grow what they have a feeling for growing things they always do their work in the right way, and with the right aim, and produce the finest fruit and the biggest crops.

The two occupations of agriculture and animal husbandry cannot be separated. The stevedore must raise feed for his cattle and the grower must have a good supply of manure, which produces on the farm, and the money that others must go to manufacturers of chemicals.

What the farmer produces for his own consumption should be sold, and he has the chance to make gains and to produce his food and live on a price that is good for him for a price. Home grown milk, eggs, butter, cheese, poultry, pork, and sometimes beef, with vegetables, and fruit in abundance, not forgetting a hundred other delicacies like maple sugar and honey give a price that is good for him, and high living and provide the best possible reason for the city man's urge to the farm.

If the farmer's cellar is full of apples, potatoes, celery, cabbage and other things, including barrels of wine and acid, and if his smokehouse is full of hams, bacon and shoulders, and the pantry shelves are heaped with home-made jelly and preserves in glass, why shouldn't he laugh out loud at the sight of the city man going to the delicatessen for a half-price can of beans or half a roast chicken (and a leghorn at that) and two oranges?

Farm life will always be popular with people who like to live well, and so long as the farm table groans it will be doubly attractive in a depression.

Women Make Farm Pay

Mother And Four Daughters Learn To Do Man's Work

Undaunted by the supposed limitations of their sex, Mrs. Pearl Johnson and her four daughters operate the thirty-four-acre farm near Latona, Iowa.

The four daughters, a Viola, Georgia, Marjorie and Gretchen, know their farm work when their father died three years ago, but as it was a boy's family the four shared equally and went to work.

They have learned to do successfully all the farm duties usually performed by men and have been profitable even during the lean years. This year they will have good crops of corn, soy beans and hay. They raised their own chickens, fed many hogs and raised much poultry. They were registered observers and teachers when their father's school teachers hang up their overalls and teach in neighboring schools.

WORLD HAPPENINGS
BRIEFLY TOLD

Two military aeroplanes collided in the air at Kielce, Poland, killing four occupants.

T. A. Love, Grand Forks, B.C., was elected president of the British Columbia-Yukon Weekly Newspapers Association.

Robert Van Riellegem demonstrated at Brussels, Germany, a miniature aeroplane which, he contends, is proof against fire and heat.

Brazil's new "pure coffee" law has become effective and hereafter stores can sell only coffee from the roaster. Ten days old is the limit.

The world Jewish Conference closed its sessions by adopting a resolution calling for a boycott on German goods until the rights of Jews in Germany have been restored.

The radio station at Cameron Bay has been destroyed by fire. It was learned in a radio message received at Churchill. No details regarding the blaze were given. The cause of the fire is not known.

Samuel Brisbane, 72-year-old chief engineer of the "Noronic" flagship of the Northern Navigation fleet, has seen 32 years' service on the lake, his anniversary being held recently.

Discussion of plans for the Canadian Medical Association Convention in Calgary in June, 1934, has resulted in a decision to invite the Prince of Wales to attend as the prince's birthday, June 23, occurs during convention.

Calgary Fish and Game Association has decided to start an investigation of the diseases which have killed thousands of ducks in southern Alberta this season. The heavy loss occurred at Stobart Lake, about 42 miles east of Calgary.

Sir Gilbert Christopher Vyle, prominent financier and industrialist, who acted as industrial adviser to the United Kingdom delegation at the imperial economic conference held in Ottawa last year, is dead at his home in Birmingham, England. He was 63 years of age.

A Queer Voyage

Trip From England To The Black Sea In Hand Propelled Boat

Oddest of many queer voyages attempted in recent years is the trip which two Edmonton, England, men have started with the Black Sea as their goal. Their collapsible boat made of a form of aluminum is operated by pedals and hand propellers. Four knots is the estimated speed of the boat, which weighs about a quarter of a ton. The itinerary is from Southampton, through the Bay of Biscay, past Gibraltar and into the Mediterranean, then along the northern African coast and to Yarna, the destination of the boat, but a call will be made at Constantinople, and the return will be by the coast of the European coast of the Mediterranean.

Scientists Are Puzzled

Have No Theory About Wild Noises Over Yellowstone Lake

Yellowstone Park rangers and scientists are still pondering, after 50 years of mystery, over the strange sounds heard over Yellowstone Lake every morning in the late summer. The weird inexplicable noises begin like the muffled sounds of birds in flight with whirring, flapping wings, rise quickly in crescendo and end as a sustained note with distinct rhythmic quality.

All theories so far offered for the phenomenon have been dispelled by observations.

Germany's Floating Airport

Anchored in Southern Atlantic And Is Fully Equipped

The German expedition "Westfalen" has been taken from Cuxhaven, Germany, to the Southern Atlantic, where it is anchored between South America and Africa as the landing place for German passenger planes to South America. It recently carried out trial trips near Rio. The "Westfalen" will be a complete floating airport, with equipment for refueling, and it has a canvas landing and take-off stage on which a plane may taxi, and take off will be by catapult.

Mutual Interests

Two men were traveling on a northbound train. Presently one, hoping to break the tie, asked his fellow traveler:

"What's your line of business?" "It may sound strange," said the other, "but I'm a pepper traveler." The first man threw out his hand and said: "Bake!" he said. "I'm a salt traveler."

Suggests Debt Settlement

Sir Harry Armstrong Has Idea For Britain and United States

Sir Harry G. Armstrong, formerly Canadian-General at New York, has written on the payment of the War debt problem, and especially on the debt of Great Britain to the United States. He discusses what is expected by the United States, what is possible for Britain to do, and then he makes certain suggestions as a compromise or at least as a practical suggestion for settlement.

This comprises cutting the amount to about one-fourth its present nominal amount, or \$1,600,000,000 estimated debt to £200,000,000 to be paid in a single sum in sterling gold bonds bearing 3 1/2 per cent. interest, which would be probably cashed in Europe giving the gold to the United States at once. This simply amounts to putting Great Britain through the bankruptcy court and accepting about 22 cents on the dollar, which is usually considered a very good settlement. Where it is considered, moreover, that it takes fully twice as much of British merchandise to pay a dollar today as when the debt was contracted, and that all securities and industrial investments have depreciated similarly, such a payment is a very fair one and repays it. The creditor is fully justified in asking its acceptance.—Hamilton Herald.

Preventing Honey Spoilage

In helping to prevent honey spoilage, the division of bacteriology, Dominion department of agriculture, has evolved a method by which an examination of freshly extracted honey will indicate whether the honey may be expected to remain safe from fermentation within one year.

It isn't the cost of getting men into office, but the upkeep that hurts.

Busy On New Theory

Einstein Pleased With Quiet Refuge On Norfolk Coast

Anybody attempting to molest Albert Einstein in his humble refuge on the Norfolk coast may get bullets from guns of his owner's game keeper. And if Commander Oliver Lockyer Lamson himself is around any intruder may have to face the revolver which the member of parliament recently is carrying while the mathematical mathematician is under his protection.

Professor Einstein arrived from London being reported to have been against his life, and set about at once in his quiet, tree-surrounded retreat to work on a new mathematical theory—the nature of which was not disclosed.

He said he was not responsible for the "Brown Book" which thrust Hitlerite wrath and which, Nazis alleged, was a compilation of vitals of persecution.

Sitting in a small hut in a garden facing the North Sea, the professor looked smilingly content as he puffed his pipe and spoke of the Nazi threat against him.

"All I want is peace, and where could I find a more peaceful retreat than in England?" he asked a visitor.

Recipes For This Week

(By Betty Barclay)

CHEESE BISCUITS

1 cup sifted flour.

1 teaspoon combination baking powder.

1/4 teaspoon salt.

1 tablespoon butter or other shortening.

1/2 cup grated cheese.

1/2 cup milk or water.

Sift flour once, measure, add baking powder and salt, and sift again.

Cut in shortening, and cheese, add liquid gradually until soft dough is formed. Roll 1/2 inch thick on lightly floured board. Cut with small, round biscuit cutter. Bake in hot oven (400 degrees Fahrenheit) 15 minutes. Makes 12 biscuits.

CALIFORNIA PRUNE PIE

2 cups cooked prunes.

3 oranges.

1/2 cup brown sugar.

1/4 teaspoon salt.

2 tablespoons butter.

1 cup liquid from prunes.

2 tablespoons cornstarch.

Baked pastry shell.

Meringue, flavored with few drops lemon extract (use 2 egg whites).

Pit prunes and cut in half. Peel orange, removing white inner peel completely and dice orange. Combine prunes, orange, sugar, salt, butter, prune liquid, and bring to a boil. Dissolve cornstarch in 2 tablespoons cold water, add to boiling mixture and cook until thick. Pour into baked pastry shell, cover with meringue and brown in a moderate oven (350 degrees Fahrenheit) for 15 minutes.

Cattle For Britain

A second shipment of best cattle exported within a month to Great Britain by the Western Stock Growers' Association was shipped recently. The consignment totals 332, Alberta ranchers contributed 120 head and the remainder came from seven Saskatchewan ranches.

An average of 600 cabs are laid up for repairs in London at all times.

PRESIDENT OF CUBA

Dr. Roman Grau San Martin, University Professor, who will form new government.

Gathering Data On Meteors

Observers Will Check Progress During Byrd's Expedition To South Pole

One hundred and twenty sky observers, located at points all over the world, will check the progress of meteors during Commander Byrd's south pole expedition.

Byrd's chief astronomer, Prof. J. Poulter of Mount Pleasant, Ia., has made arrangements for these observation stations, which will form three progressive lines from the north to the south.

One string of stations will extend from Toronto, Canada, to the southern tip of South America. Another will be operated by the British Astronomical Association and will extend from Norway through Africa. The third will start at Tokyo, Japan, and extend through Australia.

The observers will gather data on the speed and direction of fall of the meteors. Professor Poulter will operate the southernmost station of Little America, he said.

Sheep Had Long Trek

Large Flock Driven Thirteen Hundred Miles In Australia

After passing through country generally considered impassable, Drover Jack Brady and eight helpers have just completed a drive of 7,500 sheep for 1,300 miles from Mackinlay to Snowtown, Australia. To water the animals in desert spots a pumping plant and troughing was carried. The trip required 20 weeks, and at night a guard against raids by wild dogs was necessary. Only 300 sheep died on the trip.

One Sign Of Prosperity

English People Buying Good Golf Balls And Bicycle Tires

Prosperity surely is on the way, declared Sir Eric Geddes, chairman of England's largest rubber manufacturing concern, at the annual meeting in London. "People are buying first grade golf balls," once more instead of second grade piles, he said. Also they are buying bicycle tires again. "These are quite useful barometers to show whether our people are feeling good or bad about their petty cash," he added.

SUNDAY SCHOOL LESSON
SEPTEMBER 24

REVIEW—SOME EARLY LEADERS OF ISRAEL

Golden Text: "Be strong in the Lord, and in the strength of His might."—Ephesians 6:10.

Devotional Reading: Hebrews 11:22 to 12:2.

A Review By Means Of Allusions

"A man who has had the advantage of intellectual training cannot escape the penalty of his wickedness when he utters his brains for a mess of pottage."

When a generous act blazes from unselfish thoughts, The Lord is with us, though we know it not.—Lucy Larcom.

Happy the heart that keeps its twilight hour, And in the depths of heaven its peace recedes, Loves to commune with thoughts of tender power—

Thoughts that ascend, like angels soaring, A shining Jacob's ladder of the mind!—Paul M. Hayne.

"If I am only an instigator or gathering materials and another shall build the house, I trust my joy will be as great as the builder's."—William C. Cress.

"The moment we move, the dog is after us. We are in effect, 'Where thou goest, I will go.'"

"There is nothing for you an imbecile man," promised Hebron, some gift of God's infinite love. It is to you, to you, to you, Give it this mountain!"

"O, give me Samuel's ear, The open ear, O Lord, Give and give quick to hear, Each whisper of Thy Word!"

Latest born of Jesus' race, His words light thy beautiful face, While the prophets gifted with it, Leads thee the way of truth.

And his next son, for wealth, and wisdom famed, The chosen ark of God, till then in tents Wandering, shall in a glorious temple dwell—Milton.

"You won't do much until you think it's God, An' not contrivements, that holds the rod."

We need some more of God's sword I judge, For proclamations hain't no great sword—Lowell.

Uses Novel Method

King Boris Gradually Getting Better Roads For Bulgaria

King Boris of Bulgaria, an ardent motorist, wants good roads for his realm and has found a novel way of getting them. Every time he drives his car over a bad and bumpy stretch, he notes its exact location, and next day invites his minister of highways and communications to lunch or dine and discuss the location, and next day invites his minister of highways and communications to lunch or dine and discuss the location, and next day invites his minister of highways and communications to lunch or dine and discuss the location.

A royal invitation is equivalent to a command. Trembling, the minister obeys. After coffee and cigars, the king suggests a little ride into the country. The minister has to reply that he is busy. The man has been so saturated with my dominance and so easily amenable to my suggestions that there is no need for him to be in the room. If he were in Paris and I telephoned him he would do exactly as I told him. If you are wise you will do exactly as I tell you.

He is actually allowing himself to be the subjects of hypnotism. It is not worth it. It is a terrible business. Yet in certain conditions people can be hypnotized in a day with the judicious help of hypnotism."

Problem For British Banks

No Way To Stop Depots From U.S. Citizens

A large volume of "unwanted" United States money being deposited in banks of the United Kingdom constitutes a problem that so far has defied solution, two prominent United Kingdom delegates to the British Commonwealth Relations Conference said at Toronto.

"The bank rate in England is very low now," Viscount Cecil of Chelwood, chairman of the United Kingdom group, said in an interview, "and one of our chief problems is the flow of unwanted money that is pouring into the banks. These funds, deposited in the main by United States investors, are subject to withdrawal at 24 hours notice and are of little or no value, though it has not been discovered yet how to get rid of them: Their deposit appears to be actuated by a desire on the part of the depositors to find the safest place possible to house their assets."

Viscount Cecil was confident England would win the war, but he was in a hurry to get the money out of the country. He said a great deal of building was going on throughout the country. Road construction was another feature of development prominent this year.

Expedition To South Pole

Rear Admiral Byrd On Quest Of New Territory For U.S.

With a crew of 70 scientists and adventurers, Rear Admiral Richard E. Byrd, is sailing on his second expedition to the Antarctic.

The aim of the expedition is twofold: To chart and claim for the United States any areas of ice recreation about the South Pole, and to determine the extent of deposits of oil, coal and other natural resources.

The aviator and explorer announced his plans to the United States Navy. The aerial details of the expedition.

"We all feel that the steady recession of ice should have left some 200,000 square miles of open water in the South Pole. Byrd said—a trace of excitement in his voice as he talked of his new venture.

The bulk of this land, the explorer said, should be between the South Pole and South America—most of it in the realm of Byrd Land, named for his mother—which was claimed for the United States on his expedition of three years ago.

Power Of Hypnotism

London Doctor Can Influence One Patient Over Telephone

How he hypnotizes a patient over a telephone was told by Dr. Hubert C. Leonard, of London, in a lecture at Westminster Hospital. "This patient," he said, "has had to be hypnotized many times. The man has been so saturated with my dominance and so easily amenable to my suggestions that there is no need for him to be in the room. If he were in Paris and I telephoned him he would do exactly as I told him. If you are wise you will do exactly as I tell you."

New Use For Radio

Installed As Means Of Communication On Russian State Farms

State and collective farms have grown so large in the U.S.S.R. that something had to be done about communication between various sections. The Institute of Electrification of Agriculture reports that it has installed radio receivers and transmitters on the tractors or one farm near Leningrad and solved the problem. The boys and girls now play merrily along and pass the time away chat in a boat trip from Vancouver to Powell River, B.C., 70 miles up the coast.

Old Clock Recovered

Made By Ticket-Of-Leave Mechanic And Had Long History

After a journey of 100 years, W. J. Cartwright, of Tremora, Australia, has recovered a clock with a long history. It was made by a ticket-of-leave mechanic named John Maquarry's time and originally belonged to the pioneer Anglican clergyman, Rev. Robert Cartwright. Following the cleric's death in 1856 it was sold and taken to New Zealand, where the present owner found it.

Excellent crops have caused an appreciable improvement in trade in Denmark.

Finland has ruled that employers must insure their domestic servants against accident.

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER
Author of "Jorets," "Lipstick
Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first meeting, Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, paves the way for another date. This time they walk in the park. Camilla tells Peter she is not rich, or at least, will not inherit the fortune. Peter in turn confesses he is a practicing penniless. They fall into each other's arms. Together, in the park, Peter and Camilla try to arrive at some plan for the future.

(Now Go On With The Story).

CHAPTER IX.

Camilla lived in a new world, thereafter. Her face glowed with happiness and she walked buoyantly, as if the strength of Peter's arms had entered her body. The austere grandeur of the house that was still her home seemed to her as distant and intimate, as it had been in the days before she learned that it was not her home and would refuse soon to shelter her.

She was even more gracious in her social obligations. She discovered new things to like about people whom she had grown almost to detest, and she would reflect her happiness as the evening sky reflected the rosy colors of the setting sun.

Mrs. Hoyt asked no questions, but she was confident that very soon Camilla would disclose her secret. She believed that she knew how to manage girls, having devoted much time to the psychology of adolescence, the reactions of youth to life and analytical character study. She believed that she had prepared herself adequately to handle any emergency in her duties toward Camilla. Besides, she had mothered Camilla for seventeen years.

As a matter of fact, she knew as little about Camilla as the daughter she never had born. Her knowledge of children always had been limited in the abstract, in spite of her experiences with this child. From the beginning, Camilla had been fostered more successfully as Mrs. Hoyt had believed she had managed her foster daughter. With the intu-

tive shrewdness of the diplomat, Camilla had learned to submit apparently to her autocratic rule, to confide naively at that was least important to her, and to live within herself with a secret exultation.

Camilla had been right when she told Peter there was a dual personality. She had been divided against herself from the day she was sent to live in the Hoyt mansion. That part of her which was vivacious and free, which had smoldered and ached while she obeyed her mother's constant admonitions to speak softly, walk sedately and submit docilely. Fortunately, that barbaric element in her nature had not been smothered. Its chastened, cultivated veneer, now awakened by the primitive urge of love, manifested itself in spontaneous laughter, generous impulsiveness and an eager impatience to fulfill her destiny.

Mrs. Hoyt immediately suspected a romance. She watched her with her friends, trying to discover which man had aroused her interest. The girl's attitude betrayed nothing. Her new graciousness was impartial. She arranged special occasions to talk with Camilla alone, making noble hints that would lead to reluctant consent. It was not her policy that anything should transpire under her roof in the lives and moods of the children, of which she did not know every detail.

But even as Camilla deceived her rightfully, she had suspected long ago that Alexander Hoyt employed the same defense against his indomitable wife. His thin, straight lips never smiled with pleasure, but Camilla often detected the reflection

turned the world upside down for her. Amelia had approached her, she so tactfully and warmly, admitting the fact that it was a delicate situation which she was handling wisely with gloves. Which attitude was exactly what Camilla had resented most about the whole affair. Her cold practicality had congested Camilla so that there was no emotion left in her numbed consciousness; but when Alexander talked with her about the situation, his cold sympathy melted her so that she found herself feeling a kind of pity for him rather than for herself. She even could make some sense of the whole strange affair. It had been Mrs. Hoyt who had started it, impulsively, but it was this silent, unemotional man who reconciled the bewildered girl to the facts.

"You understand, Camilla, that this was not my idea in the beginning, but I want to share the responsibility," he told her quietly. "I should have preferred that you had grown up knowing the truth, but—I had looked at her, as much as to say that she would understand why his idea had not prevailed. 'If we have done you a very great injustice, I'd like to try to make it right, somehow. You have three years in which to adjust yourself before you need to change your position here as our daughter. Will you let me know how I can help people these years?'"

Camilla had promised that she would, and later, when she had proposed to enter National, at the age of twenty, she had displayed to her father a slight access of interest in her work and so far as

Mrs. Hoyt immediately Suspected A Romance.

of an inward twinkle in his keen, dark eyes. It even seemed to her that he derived amusement from the very thought that Amelia Hoyt was not getting away with as much as she believed she was. But whatever she believed, she did not trouble him. His capacity for authority was exhausted in his business and he was well content to give his wife the reins at home.

When Camilla had first lived with the Hoyts, everyone had been amazed that she did not fear his austerity, for he appeared to treat her no differently than anyone else, and everyone held him in awe. But the two masters of Amelia Hoyt's tyranny apparently had discovered a sympathetic bond that is common to all martyrs of the same cause, and without putting it into words or actions had lived by its sustaining power.

The nearest gesture toward paternal affection that Alexander Hoyt ever had displayed for Camilla was when he rarely took her awkwardly upon his knee, as a child, and permitted her to examine his watch, or when he shyly smuggled a gift for her under the Christmas tree, or when he praised or humored her but as she grew older, Camilla was sure that she sometimes detected a flicker of withheld appreciation in his eyes.

At other times, when he was reprimanded or commanded by Mrs. Hoyt, she suspected that he was laughing with her at her quiescent submission. Did he, too, only appear to submit to Amelia to save argument and energy, because opposing her was as useless as hurling one-self against a stone wall?

Years later, he had been the kinder of the two when they had explained to her their plans for her as she was a child, and he had been the kinder of the two when they had explained to her their plans for her as she was a child, and he had been the kinder of the two when they had explained to her their plans for her as she was a child.

she knew, did not take her ambition seriously. But he never opposed her. The situation between her own parents was quite the opposite, she learned when she began to visit in their home. During the fourteen years she had not been in contact with the Lorenz family, she had gone there occasionally with Mrs. Hoyt, and very rarely her own mother had visited her at the Hoyts.

But she had known them only as a family in which Mrs. Hoyt was curiously interested. She had played with Rose and Frank and Anna and the others at various times, and liked them well enough, unaware that they were brothers and sisters.

Her own father—bored and bullied at the foundry by foremen and foremen, became the autocrat at home, never displaying the least of his power. His wife meekly accepted his rule to the letter, impressed the children with his authority and commanded their obedience with the threat of, "You'll see what happens when I tell your Pa on your tonight!"

Camilla could remember as a child how she had feared to visit at the Lorenz home when he was there. Several times, he had taken her on his knee and chucked her under the chin and laughed raucously at her frightened expression. At first, she had been repulsed, but later, when she had grown up, she had recognized for her to forget her family culture, but vague memories had stirred in her childish mind and troubled her, every time she saw any of them through the years.

After the revelation of the whole situation, she had gradually fitted together that series of memories and incidents, like a difficult picture puzzle. She loved her own mother with a mingled pity and resentment, but she never was able to think of her as her father. From her modern and sophisticated background of culture, she studied when the woman whom she recognized an occasional char-

"The prettiest rag rugs I ever saw"

"I feel I should share with you a wonderful compliment I have received on my new rag rugs," writes an appreciative "Three Rivers woman." "A wealthy lady from the City of Quebec was visiting here and saw the rag rug I had just finished. She was enthusiastic—said she had never seen such artistic ones, with such rich, lovely colors. She asked me if I bought new materials to get such beautiful color effects. When I told her I had dyed my old scraps with Diamond Dyes, she simply couldn't believe it. Of course I'm very proud of my rugs. Besides being beautiful colors, they are fast and washable." In the popular new art of rag making we are finding again the real value of Diamond Dyes for permanent color fastness. No other dyes make old materials look so new and rich in color, because no other dyes contain so much of the finest aniline colors. For light dainty rugs, or for the more elaborate summer houses and dresses, use the wonderful new Diamond Tints. All rug stores have both Diamond Dyes and Diamond Tints.

acteristic of her mind; but hers had been so refined and cultivated that little resemblance was left.

Henry Lorenz was the kind of naturalized American citizen who liked to call attention to a yard of parked automobile, below Westminster, with a slight accent. "See them cars—hundreds of 'em? Who owns 'em? We all do. Yes, sir! Even laborers in this country ride to work in their own automobiles. You don't see nobles like that in the old country. Why, a man does well to have black bread and sour milk over there. We have the best of everything here: food and clothes and homes, and our automobiles—everything 'Yes, sir!'"

His boast was not so much a testimony of patriotism as it was a direct praise of his own wisdom in adopting this new country for his own. Camilla had reconstructed that ambition in her imagination.

(To Be Continued.)

Build New Bridge

Two Million, Dollar Structure For Ladner, B.C.

Construction of the proposed \$2,000,000 bridge across the Fraser River at Ladner, below Westminster, will go ahead shortly under plans of the Ladner Bridge Company, according to information received from the British Columbia Engineering company retained to build the bridge. Engineers will leave England for Vancouver within the next few weeks if it is stated.

It is understood financial arrangements for the bridge project have been completed in England. British Columbia government already has passed an order-in-council embodying an agreement with the bridge company. The city of Westminster has also passed a resolution project and asked for the present project approval, but this has been denied.

THE RHYMING OPTIMIST

By Aline Michaelis

AGE SHOWS THE PATTERNS

Age takes away such vivid things: This sense of wonder and of wings; This glad response to morn's gay call; This foreign scene when first we find. This glad response to despair.

Age shows men patterns which they made In those young years when, unafraid Of any challenge, any threat, They knew no menace, no regret. Age points the meaning of the day. They wandered through in carefree days.

Such lissened life scarce seems to me Of any challenge, any threat. But age has other boons to give: The gift of quiet, where unrest no longer rules the mind's excited breast; From many yearnings a release, And after care and conflict, peace.

Age shows men patterns which they made In those young years when, unafraid Of any challenge, any threat, They knew no menace, no regret. Age points the meaning of the day. They wandered through in carefree days.

HELP FOR TINKRED WIVES

Take Lydia E. Pinkham's Vegetable Compound

When you get tired during these hard times, take Lydia E. Pinkham's Vegetable Compound. It will give you the strength and energy you need to get on your feet. It will give you the strength and energy you need to get on your feet.

An Extraordinary Tunnel

Built in England To Test Air Currents For Planes

At the Royal Aircraft establishment at Farnborough, an extraordinary tunnel is nearing completion. It is 24 feet in diameter and it is so arranged that currents of air at speeds up to 200 miles an hour can be blown through it. Its purpose is to enable experiments to be made on aeroplanes. The tunnel is nearly 700 feet in length, but it is made on a curve and housed in a building 230 feet long, 140 feet wide, and 90 feet high. The wind is produced by fans driven by motors of 2,000 horse-power. In designing aeroplanes it is of the utmost importance to know the air resistance of a particular shape of wings, or motor or engine cowling. Hitherto experiments have been made either in actual flight or with miniature wind tunnels. To make them in flight was a risky business, and also, it was not exactly correct. It has been found that a round strut has an air resistance a hundred times as great as one of a streamline shape.

Little Luck For This Week

"O fear the Lord ye His Saints; for there is no word to you who fear Him." Psalm 34:9.

"Thou openest Thine hand and satisfiest the desire of every living thing."—Psalm 145:16.

What Thou should today provide, for a child receive. What tomorrow may bring, kindly to Thy wisdom bring. That enough Thou wilt care, Why should I the burden bear? —J. Newton.

Have we found that anxiety about possible consequences increased the clearness of our judgment, made us clearer and braver in meeting the present, and arming ourselves for the future? If we had prayed for this day's bread and left the next to itself, if we had hurried our days together, not allowing to each its own task but ever deferring that to the future, and drawing on the future for its own trouble which must be met when they come, whether we have anticipated that or not, we should have found a simplicity and honesty in our plans, a capacity for work, an enjoyment in it, to which we are now for the most part strangers.—F. D. Maurice.

League Of Nations In Canada

Radical Re-Organization Of The Society's Work In Foundation

A scheme for radical re-organization of the society's work in Canada in future was adopted at the 11th annual meeting of the League of Nations Society in Canada.

Under the plan, a national council of 10 members from all parts of the country will be formed. The new president is likely to be some outstanding Canadian and it is indicated may not be a resident of Ottawa.

The new national council is empowered to consider the appointment of a national secretary as chief executive officer of the society to be known as national secretary. This officer also will edit the official quarterly publication, "Interdependence," and have charge of the society's publicity work. A central executive of the council, composed of 10 members, meeting at Ottawa as the continued headquarters of the society, also will be set up. The nominating committee's report is to be given later.

Had Worried For Nothing

Orin Johnson, chief mechanic for the Grand Hotel, has been told that the tree that he had been worried about for the United States was not feeling quite so happy. He was rather worried, but in the first time since he has been riding in Wood boats, he had been unable to find a four-leaf clover. In every place he had been, he had found a four-leaf clover. In every place he had been, he had found a four-leaf clover.

Most Own Gas Masks

Disturbed at the political situation in western Europe, the Turkish Government has decreed that all Turks must provide themselves with gas masks at their own expense and that in every village gas and bombproof shelters must be built. The government has also decreed that all factories to make gas masks.

An electrically-driven miniature motor car intended for children's use in gardens and private grounds is being marketed in England. The peculiar feature of the car is that it is self-starter, horn, lamps, accelerator, etc.—of a real auto.

Germany has placed a higher tax on strong beer than on light beer.

Madame Lacroix's delicious CHOCOLATE LAYER CAKE

4 cup butter
1 cup sugar
2 eggs
1 teaspoon vanilla extract
1 cup milk
1 cup pastry flour (of 2 cups and 3 tablespoons of bread flour)
1 teaspoon Magic Baking Powder
Mix as usual.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and beating; add flour, sifted with salt; add egg whites, beaten; add vanilla; beat 10 minutes. Bake in 9 inch round cake pan 25 minutes. Ice with Magic Baking Powder.

TOWN & COUNTY Personalographs

Fred Worley spent the week end in Calgary.

Miss Winnie Poxon came out from Calgary on Friday and spent the night of days at her home here.

Don't forget the dance tomorrow night in the Farmers' Exchange hall. Harold Edwards returned to Mount Royal College, Calgary, on Monday to resume his studies at that institution.

Mr. Alder of Calgary spent Sunday in Carbon and visited at the home of Mr. and Mrs. W. Poxon.

Rev. Wm. McNichol spent Tuesday and Wednesday attending a presbytery meeting at Elmore.

Mr. and Mrs. H. C. Wilson were Drumheller visitors on Saturday.

Mr. and Mrs. C.A. Dunsmore and Mr. and Mrs. H. Brown motored to Calgary on Friday.

Mr. and Mrs. W. Poxon, Len Poxon, Mrs. R. Heath, Mrs. S. Poxon and Mrs. Hossent went into Calgary on Tuesday with Mrs. Eli Poxon, who left that day for Regina.

It is thought of Trochu was a Carbon visitor on Thursday last. Mr. Mathieu is an expert in radio work and elsewhere in this issue announces

a return visit to Carbon to do repair and other work on radios.

Ralph Koech had a narrow escape on the hill leading south from Carbon on Tuesday evening. He was bringing his well drilling outfit into town and when on the hill attempted to shift the tractor into low gear. The weight of the well drilling outfit behind was too great, however, and Mr. Koech was unable to shift the gears on account of the speed of the engine. The outfit went into the steep ditch at the corner and the engine turned over, but Koech was able to jump clear just as the tractor was going over. The drilling machine remained right side up.

Mr. and Mrs. J.H. Oliphant motored to Calgary on Tuesday.

A. F. McKinnin is having a new front put on his drug store. When completed the door will be in the center with two plate glass display windows, one on each side. Elmer Hill is doing the work.

Clarence Hay arrived last week from Lethbridge and is spending his holidays with his wife and family here.

Richard Garrett was taken to the Calgary hospital on Tuesday evening suffering from an attack of appendicitis.

Snicklefritz

She was only a miner's daughter but—what natural resources.

Judge: "Have you anything to say in your behalf?"

Prisoner: "No, your honor, except that those beautiful women of the jury—I mean those wonderful, graceful—"

Lawyer: "I object your honor."

Prisoner: "But they are beautiful—and I—"

Judge: "It's no use—we may as well resume the case now."

"I've got a new idea. Fortune in it."

"What now?"

"It's an alarm clock that emits the delicious odors of frying bacon and fragrant coffee."

"Two girls in the general office were talking during lunch hour."

No. 1—And you say he doesn't know how to kiss?

No. 2—I said he didn't know how to kiss.

The amateur gardener was showing the beauties of his greenhouse.

"This," he said, pointing to a flower, "belongs to he petunia, family."

"Does it?" commented the sweet young thing. "I suppose you're minding it while they are away."

A woman walked into a certain store and asked for a package of Limburger cheese. She was not satisfied to buy light cheese, so the grocer unscrewed it for her to sniff. "It doesn't smell as strong as the kind I used to get," she complained.

"Well, ma'am," drawled the proprietor, "it's hard to distinguish the odor nowadays with business so rotten."

A veterinary surgeon was instructing a farmer as to a suitable method for administering medicine to a horse.

"Simply place this powder in a gas pipe about two feet long, put one end of the pipe well back in the horse's mouth and blow the powder down his throat."

Shortly after the farmer came running into the veterinary's office in a distressed condition.

"What's the matter?" asked the veterinary.

"I'm dying," cried the farmer. "The horse blew first."
